

# Curriculum

- Creative expression through music, art, and language.
- Respect for God and His creation as well as for others.
- Social studies, science, nature, math, and computer skills/content for 3, 4, and 5 year olds.
- Spiritual values through weekly chapel. Bible stories and monthly memory verses.
- Development of cognitive skills in the areas of literacy and mathematics.
- Learning to problem-solve and think logically.
- Personal and physical growth through appropriate hygiene, self-control, exercise, and rest.

## Meeting Individual Needs

Although your child is placed in a classroom based on age, students are assessed and taught from their individual points of mastery. New goals are set for students who have mastered all the standards set for the whole class. This is possible due to our small teacher to student ratio. It results in greater gains for your child.

For more information about our curriculum, check out:

<http://www.creativecurriculum.net/> or come by and ask to see some of our curriculum materials.

To see the "Early Learning Standards" set by the state of Georgia for all preschoolers, check out:
